

BASELINE SHIELD

VERSION 13.0

Professional Desktop Protection & Instant System Recovery

Baseline Shield v13.0 is an enterprise-class endpoint protection and instant reset software designed for shared workstations and public access terminals. It guarantees full system integrity by automatically purging unauthorized changes, software downloads, malware, and registry edits upon restart—ensuring zero downtime and a pristine user experience every single time.

SUPPORTED OS Windows 7 8 10 11	LATEST BUILD 25H2 Ready	ARCHITECTURE UEFI & GPT	MANAGEMENT Free EndPoint Manager
--	-----------------------------------	-----------------------------------	--

HOW IT WORKS

STEP 01 Capture Baseline System captures and locks a pristine master snapshot of your optimal configuration, applications, and settings.	STEP 02 Unrestricted Work Users work freely—installing software, downloading files, testing apps, or altering settings without risk.	STEP 03 Instant Reset Upon restart, system purges all session changes and instantly reverts back to the baseline snapshot.

KEY OPERATIONAL BENEFITS

KEY ADVANTAGE	OPERATIONAL IMPACT
Reduce Maintenance by 90%	Drastically cuts IT support tickets and manual OS rebuilds caused by user error or software conflicts.
Eliminate System Downtime	Ensures workstations are always operational and ready for the next user with zero "out of order" delays.
Standardized Environment	Enforces consistent software setups, desktop layouts, and security configurations across all terminals.
Comprehensive Cyber Defense	Instantly neutralizes viruses, malware, keyloggers, spyware, and ransomware upon reboot.

PRODUCT DIFFERENTIATORS

Absolute Threat Defense	Blocks both known and unknown (zero-day) threats by invalidating unauthorized drive modifications.
Flexible Restore Schedules	Set restoration rules on restart, logoff, idle time, hourly, daily, weekly, or manual trigger.

No Hidden Partitions	Uses intelligent sector redirect technology—saving disk space without requiring separate storage partitions.
5-Second Snapshot Updates	Update and apply a new master baseline in under 5 seconds without user interruption or reboot delays.
Free EndPoint Manager	Includes powerful network management software to centrally manage, update, and control PCs remotely.

TARGET ENVIRONMENTS

Education & Universities

Computer labs, student workstations, and testing centers.

Libraries & Public Kiosks

Public internet search terminals and information access points.

Hospitality & Gaming

Hotel business centers, guest PCs, and internet cafe terminals.

Corporate & Government

Shared hot-desking stations, training rooms, and secure access terminals.
